RPG/COBOL developer

Farmers Union Mutual Insurance Company of Montana, seeks a motivated, self-starting RPG/COBOL developer to support its future development initiatives. This position is in Great Falls, Mt and will require relocation. The individual for this position must possess the ability to develop, test, debug and implement applications in RPG IV and/or COBOL as well as a strong ability to investigate & analyse existing programs for system enhancements.

The legacy policy management system at Farmers Union Insurance uses DB2 and is written in COBOL. Our new development is being done with BCD's WebSmart ILE development tools, any knowledge of HTML, Java Script, and/or JQuery and knowledge of web based programming and concepts are pluses. Knowledge of Windows XP, 7, and Windows SBS are also pluses.

Solid working knowledge of the IBM System i (i5, iSeries, AS/400), excellent communication skills, and the ability to communicate at all levels within the organization, is a must. Only candidates with solid programming skills (above) with the ability to work in a fast paced, (multi-tasking is required at times) team oriented environment will be considered.

We offer a stimulating work environment, competitive salary, 401(k) plan with company match, generous Personal Time Off policy and an exceptional comprehensive benefit package.

For consideration please send your cover letter, resume, & salary history to fumicojobs@yahoo.com
